# RoboCup

---

## Che cos'è

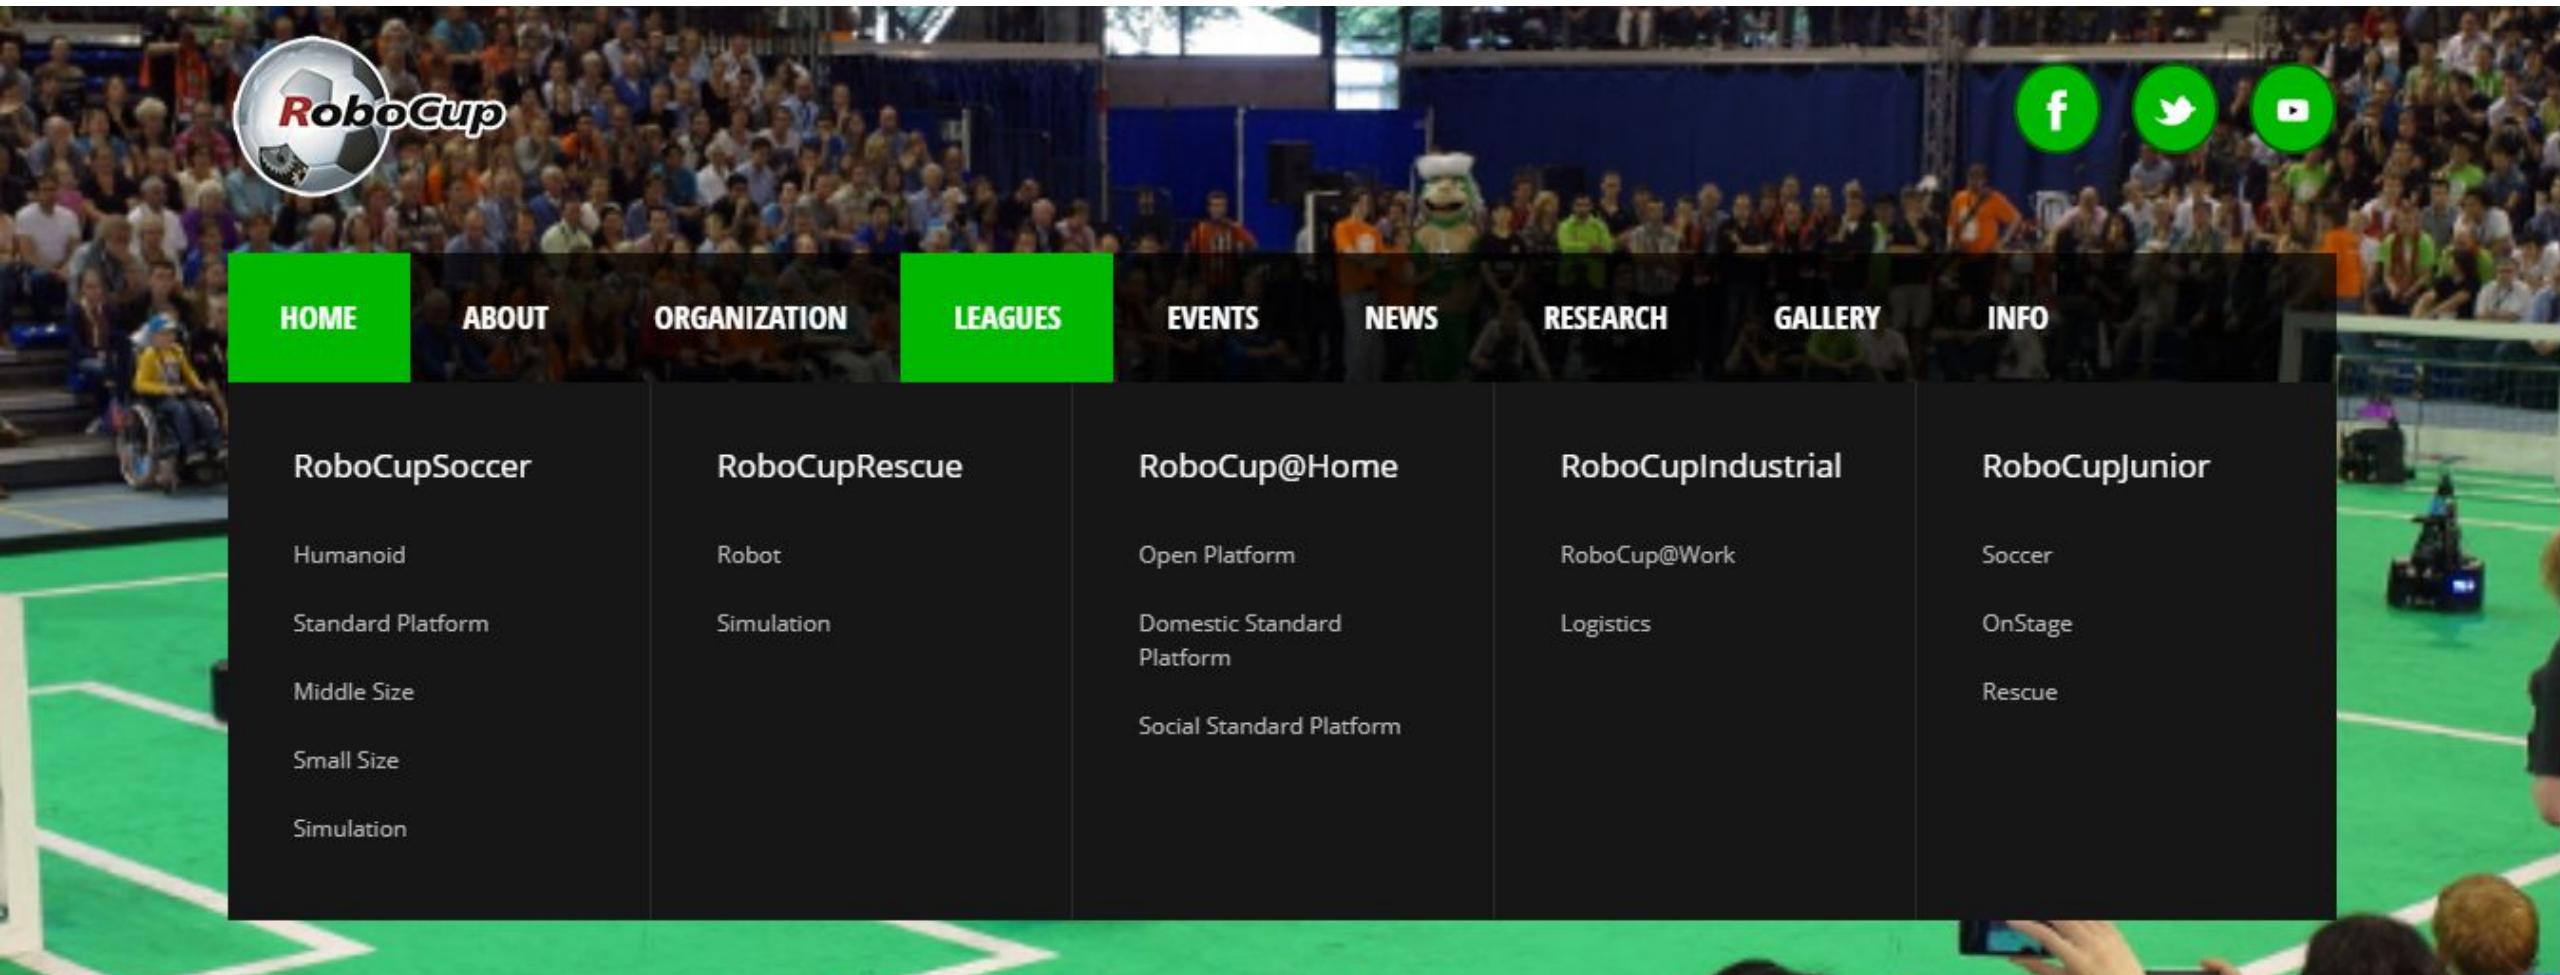

La RoboCup è una competizione internazionale che si tiene ogni anno con la partecipazione di oltre 5000 robot programmati da studenti e ricercatori provenienti da 35 nazioni differenti

## Obiettivo

Entro il 2050, costruire una squadra di robot umanoidi completamente autonomi in grado di battere la squadra campione del mondo FIFA

# Leghe RoboCup

The website features a large banner at the top showing a soccer field with spectators and a mascot. Below the banner is a navigation menu with green buttons for 'HOME', 'ABOUT', 'ORGANIZATION', 'LEAGUES' (which is highlighted), 'EVENTS', 'NEWS', 'RESEARCH', 'GALLERY', and 'INFO'. To the right of the menu are social media icons for Facebook, Twitter, and YouTube. The main content area is divided into five columns. The first column contains links for RoboCupSoccer (Humanoid, Standard Platform, Middle Size, Small Size, Simulation). The second column contains links for RoboCupRescue (Robot, Simulation). The third column contains links for RoboCup@Home (Open Platform, Domestic Standard Platform, Social Standard Platform). The fourth column contains links for RoboCupIndustrial (RoboCup@Work, Logistics). The fifth column contains links for RoboCupJunior (Soccer, OnStage, Rescue).

RoboCupSoccer	RoboCupRescue	RoboCup@Home	RoboCupIndustrial	RoboCupJunior
Humanoid	Robot	Open Platform	RoboCup@Work	Soccer
Standard Platform	Simulation	Domestic Standard Platform	Logistics	OnStage
Middle Size		Social Standard Platform		Rescue
Small Size				
Simulation

# RoboCup SPL

---

The RoboCup **Standard Platform League** is a RoboCup robot soccer league, in which all teams compete with **identical robots**

The robots operate fully autonomously, i.e. there is no external control, neither by humans nor by computers. The current standard platform used is the humanoid NAO by [SoftBank Robotics](#)

# Perché il calcio?

---

1. È un gioco dinamico che richiede **autonomia**
2. i robot della **stessa squadra** devono cooperare con i compagni per giocare
3. la presenza dell'**avversario** rende complesso l'obiettivo di vincere la partita

# Robot mobile autonomo

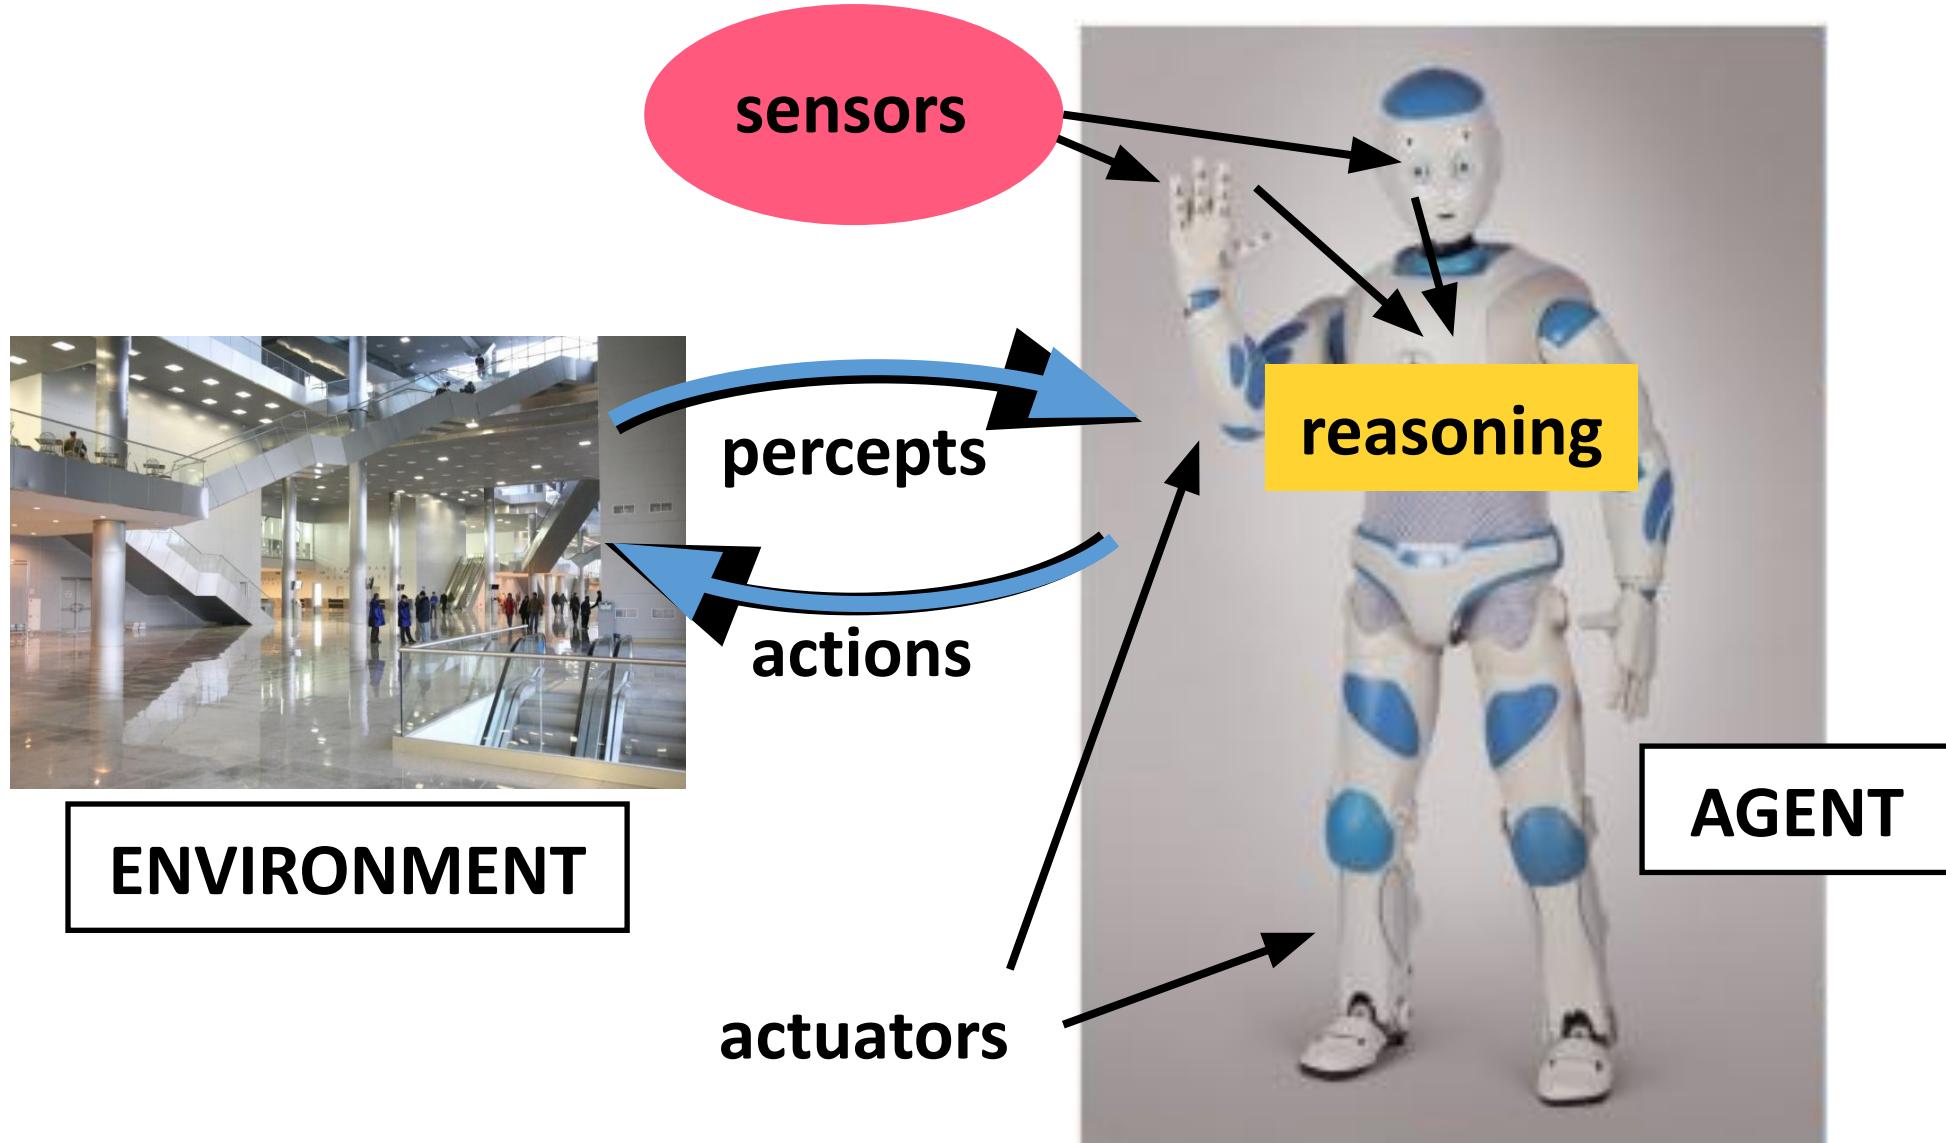

---

- **Autonomia:** capacità di portare a termine un compito basandosi sullo stato e sulle percezioni correnti, senza intervento umano
- **Sistema autonomo:** un sistema che prende decisioni da solo, agendo senza la guida di un umano
- **Robot mobile autonomo:** sistema robotico autonomo capace di muoversi nell'ambiente

## WELCOME TO THE HOME OF THE WOLVES

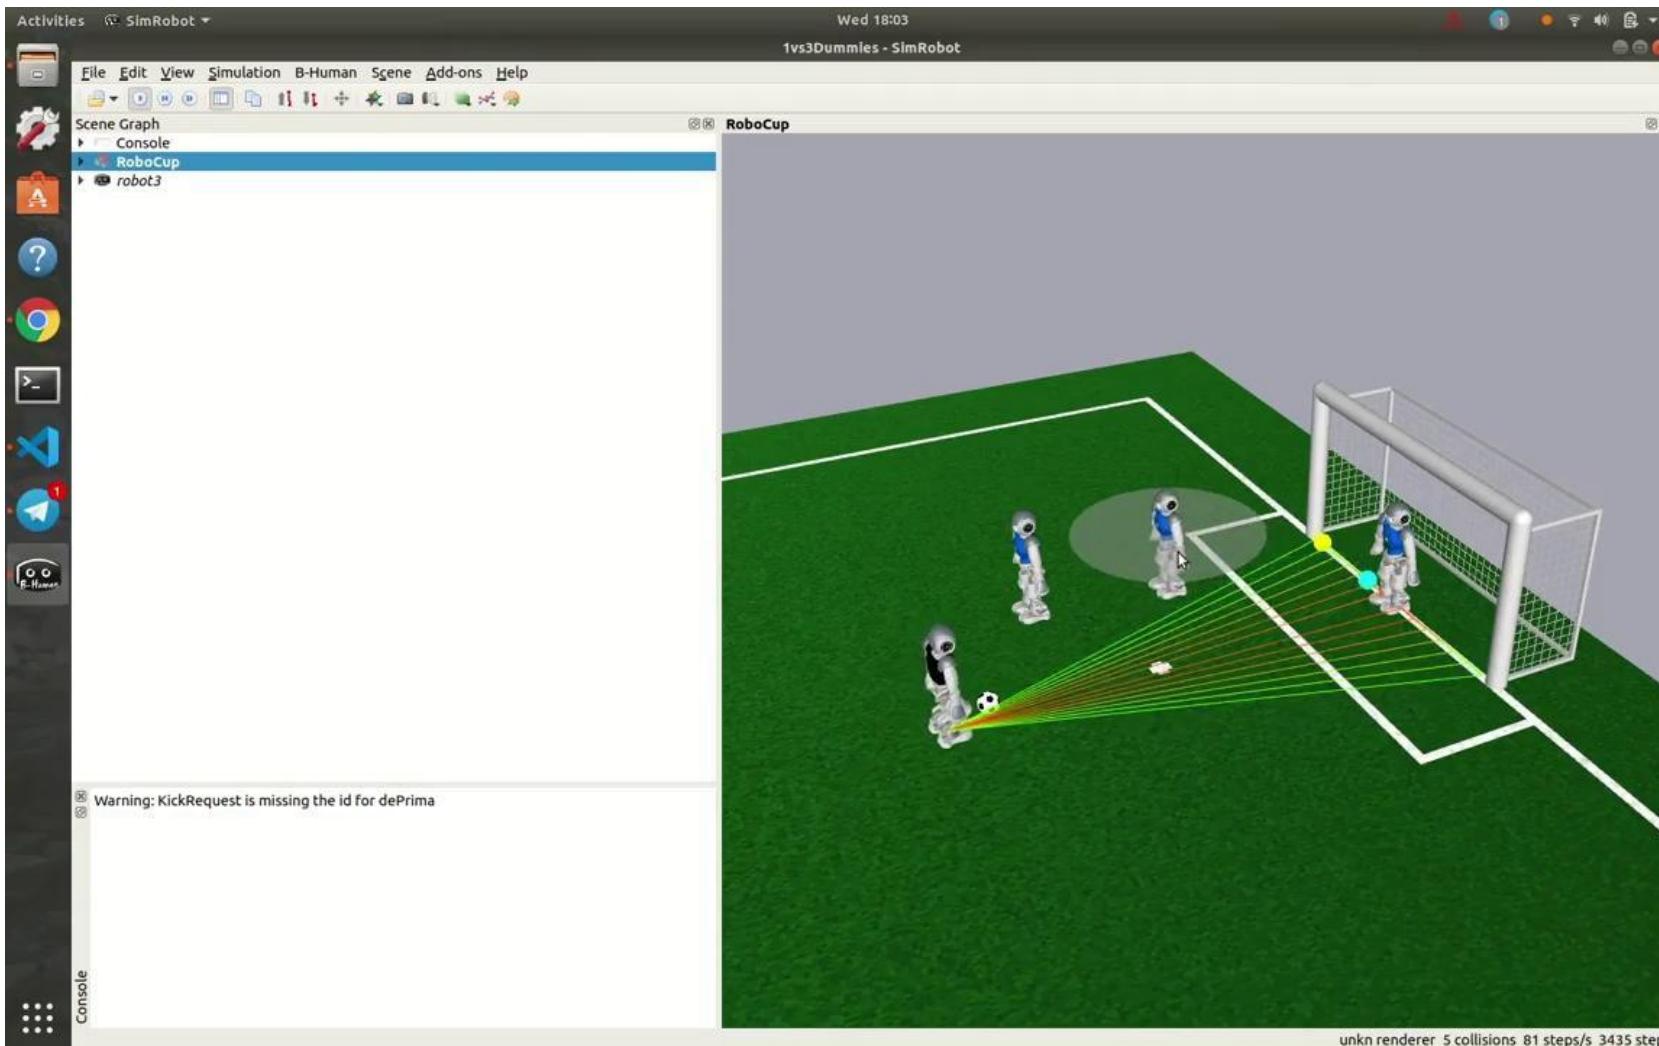

UNIBAS WOLVES is the robot soccer team of the [University of Basilicata](#). Established in 2019, it is focussed on developing software for NAO soccer robots participating in RoboCup competitions.

UNIBAS WOLVES team is twinned with [SPQR Team](#) at Sapienza University of Rome.
